

**AMENDMENTS TO THE SPECIFICATION**

Please replace the paragraph beginning in page 7, line 9, of the present Disclosure with the following amended paragraphs:

--- The spray member may form a spray space (i.e., internal space) having an opening at its one end and having the orifice at the other end, the first flow path may introduce the washing water to the spray space from the opening, the second flow path may introduce the washing water to the spray space from its peripheral surface, and the spray space may have a cross-sectional area that gradually or continuously decreases from the opening to the hole.---
